

# LOOK AND FEEL YOUR BEST.

## PHILOSOPHY

Over my last ten years in private practice as an internal medicine doctor (seeing over 15,000 patients), I have come to realize that most illnesses arise from poor lifestyle choices and aging. If you have good genes, poor choices may not affect you in your 20s or 30s, but eventually they will catch up with you. People are widely discontented with medications and surgeries as the only answers.

This is where the idea for Renaissance Medical started, a place where the aging process can be optimized with innovative technology and precision medicine. Poor lifestyle choices of the past can be corrected with our knowledge and application of redefined modern medicine.

Skin is the largest organ in the body. It needs constant care to maintain a glowing and radiant appearance well into advanced ages. With our multi-modality treatment approach, we can respond to individual needs effectively with little to no downtime.

For optimal and balanced health and beauty, we can replace lost protective hormones that were in our youth. We will assess the root cause of your illnesses, if any, your body composition, nutrition profile and give you what you need to thrive.

These are a few of the services that we provide at Renaissance Medical. We are a huge proponent of the concept called "Prejuvenation." We encourage our clients to start taking care of their bodies while it's in good condition and prevent premature aging and deterioration. Simply put, preventing disease is a much more feasible task than curing disease. This idea equally applies to all aging related matters and we guide our clients to achieve optimal "prejuvenation" results and of course rejuvenation goals.

It is fulfilling for us to see our clients' eyes glow when they feel renewed and see that there is hope. Feeling how they used to feel in their youth is truly priceless and that is what we are striving for.

At Renaissance Medical, it is our mission to provide whole person care which optimizes health-span, vitality and beauty for all of our clients.

## OUR REVIEWS

---

“I went for my first BBL treatment with Dr. Zheng to treat my rosacea, fine lines and for general anti-aging effects... I was AMAZED that there was zero swelling, redness or side effects from BBL! It’s painless without the use of topical anesthetics. And best part: my rosacea was gone the next day! It was cured overnight! This is a miracle in the skin care world if you ask me!”

“Such an excellent experience!! I tried the ZWave therapy & received hormone injections to treat my ED issues, which can be embarrassing to even discuss. Dr. Zheng made me feel super comfortable and I’m wonderfully grateful for all the comprehensive care and expertise. Absolutely thrilled to have found her and a way to ease my bedroom anxiety:) TY sooo much! xo”
